VARIETY IMPROVEMENT AND PEST MANAGEMENT SECTION

Propagation II, PHIL 2018 Series

- Date of Completion of Study: May 2023
- Date of Completion of Terminal Report: May 2023

Thirty promising Phil 2018 Series clones/varieties were propagated in SRA-LGAREC from November 2022 to May 2023. These were cutbacked and the canepoints produced were further propagated to increase number of planting materials. Ratoon of these clones/varieties were also maintained and cultured to facilitate additional supply of planting materials.
