VARIETY IMPROVEMENT AND PEST MANAGEMENT SECTION

Sugarcane Disease Garden as Source of Inocula for Resistance Trial

- Date of Completion of Study: December 2023
- Date of Completion of Terminal Report: December 2023

Seven varieties namely: Phil 6111, Phil 7464, Phil 7779, Phil 8839, Phil 8013, Phil 56226, VMC 86550 and mixed clones were ratooned last January 2023 to December 2023 to augment inocula for disease resistance studies. These varieties served as resistant and susceptible checks for resistance trials to smut, downy mildew, yellow spot and leaf scorch.
