VARIETY IMPROVEMENT AND PEST MANAGEMENT SECTION

Multiplication I, PHIL 2020 Series

- Date of Completion of Study: August 2023
- Date of Completion of Terminal Report: November 2023

Three hundred three Phil 2020 Series clones selected from Row Test, Phil 2020 Series were multiplied (Multiplication I) and simultaneously tested for smut. Multiplication I was laid out and planted in January 2023. Care and maintenance of sugarcane plants were done based on SRA cultural practices. One hundred eighty clones were selected for Multiplication II and Downy Mildew screening in August 2023 based on their agronomic and morphological characteristics.
